3. Client service
4. Product features

#### Codoxo’s Key Product Features, As Noted in the Report:

- Transparency pointing to source data
- Customized reports and dashboards
- Self-service data filtering, viewing, querying, reporting, exporting and document gathering
- A dashboard that presents a running tally of recoveries and savings, prevented losses, exposure amounts, and the statuses of cases for a real-time snapshot on the health plan’s exposure.
- Case management, queries, customized reports and dashboards are part of the **integrated base platform** and do not require additional fees.
- Aggregate views and drill-down views into claims
- Location analysis
- Interactive visualization

#### What Aite Group Has to Say About Codoxo:

*“As a newcomer to the payment integrity vendor landscape, Codoxo is a small but mighty player that comes from academic roots with forward-looking AI skills. The vendor is likely to disrupt the market between its strong data dashboard visualization capabilities and willingness to work with new accounts or potential accounts.”*

*“Codoxo’s groundbreaking work helped build the Forensic AI Platform, which accurately and quickly detects risks and costs, especially those previously unforeseen.”*

*“Codoxo is very forward-looking and open to applying new concepts. It provides an integrated solution that includes analytics and case management, and the product optimizes client resources and is highly customizable.”*

*“Codoxo provides preset data to users, putting the payment integrity recovery within a click of a button for health plan users. The vendor can also run the health plan’s data through an algorithm that highlights trends or outliers, which is very useful.”*
