

UNCOVER MORE OVERPAYMENTS AND BOOST RECOVERIES WITH AI-DRIVEN, EXPERT-LED HEALTHCARE DATA MINING SERVICES

Codoxo's Data Mining Services use advanced AI and expert analysis to uncover overpayments, anomalies, and errors that traditional tools miss. Designed for healthcare payers, agencies, and PBMs, our flexible services enable your team to increase recoveries while reducing manual workloads.

Outsource Your Data Mining with Confidence—AI-Powered Insights, Expert-Led Recovery, and Flexible Services Tailored to You

KEY FEATURES

EXPERT-LED ANALYSIS WITH AI DATA MINING TOOLS

Advanced AI algorithms identify anomalies, billing errors, waste, and abuse in healthcare claims with unmatched precision

OVERPAYMENT IDENTIFICATION & RECOVERY

Proprietary AI detects overpayments with unmatched accuracy, outperforming traditional rules-based methods to maximize recoveries

PROVIDER OUTREACH & RECOVERY PURSUIT

Codoxo's team can manage recovery efforts, including communication via a secure portal, dispute resolution, and fund collection, using customizable templates and a secure provider portal

FLEXIBLE END-TO-END SERVICES

Choose the level of support you need—from anomaly detection through provider outreach, dispute resolution, and recovery collection.

Maximize Recoveries While Freeing Internal Resources—All Without Sacrificing Accuracy or Speed

Codexo's Data Mining Services leverage advanced AI technology and specialized expertise to identify hidden overpayments, uncover billing anomalies, and detect patterns of waste, abuse, and errors. With adaptable service models, we can handle the entire data mining workflow or specific components—from discovery and analysis to provider engagement and recovery support—customized to align with your organization's operational requirements and strategic objectives.

KEY BENEFITS

IMPROVE RECOVERY OUTCOMES

AI adapts and learns to flag patterns that evolve over time, uncovering billing errors, waste, and abuse missed by static rules.

SPEED + ACCURACY AT SCALE

Accelerate anomaly detection and recovery efforts.

FREE INTERNAL TEAMS

Enable your team to focus on higher value initiatives by offloading data mining efforts

CUSTOMIZE FOR YOUR NEEDS

We work the way you work—offering identification-only or full-service engagements depending on your goals and resources.

Outsourced Data Mining Services Advantage

Identified \$162,000 in recoveries for a single code at one payer

Detected multiple misused codes in Medicare populations

Flagged providers billing multiple units of per diem codes

Identified improper code pairs missed by rules-based edits

Smarter Healthcare Cost Containment Starts with Codexo

Data Mining Services are delivered through Codexo's Unified Cost Containment Platform, empowering healthcare organizations to take a seismic shift left by ensuring faster, more accurate claim payments, reduced fraud, waste, and abuse, and enhanced operational efficiency. By transforming the landscape of healthcare cost containment and payment integrity with industry-leading AI, Codexo is at the forefront of making healthcare more affordable.
